

PAUL M EWER
PRINCIPAL

“Always do right. This will gratify some people and astonish the rest.”

- Mark Twain

Paul makes client relationships a top priority as a principal of Quantum, by working as a link between the client and the design team. Degreed in Architectural Engineering, Paul is well equipped to take on the challenges of balancing client’s future needs with their existing resources. Paul's problem-solving abilities and his in-depth understanding of all areas of design and construction give him the tools he needs to oversee and ensure quality in all aspects of a project.

Paul served as the Vice President of Design/Partner with Designplan for three years. His responsibilities over his ten years of employment with Designplan included project and client relationship management, design staff manager and new business development. Previously Paul was head of the mechanical engineering department for another architectural firm and responsible for mechanical, electrical, and plumbing design of retail and commercial developments. His career experience encompasses civil and structural design, as well as multiple years in the architectural industry.

Through Paul’s efforts and strong relationship skills, clients have been pleased not only with their project outcome, but the design process as well. He has been instrumental in the successful completion of projects for satisfied companies such as Eli Lilly and Company, Claddagh Irish Pubs, Indiana Energy Association, NiSource, ConAgra Foods, Westfield Public Library, and multiple not-for-profit organizations.
